*****.Are you interested in learning about a disease that effects

a lot of people but is relatively untreated? Human body is

made of number of numerous small and big organs that work

together as a system. Each of these organs plays a specific role

in the body and operates in co-ordination with other systems.

When all of these parts function properly, a person is healthy

and fit. There are several factors that determine how healthy a

person is, but the most important factor is the food he eats.

What goes into the stomach of a person directly influences how

he feels and how it affects the body. So, it is not surprising

when somebody says that health of the gut determines the

overall health of the body. With the progress of medical

science, there is diagnosis and cures available for some of the

most life threatening diseases. But, some discussions and

conditions are still under debate in the medical community;

one of them is whether Leaky Gut Syndrome exists or not.

Though opinions over it...
