This item is printed on demand - Print on Demand Neuware - Research Paper from the year 2014 in the subject Engineering - Nuclear Engineering, grade: 1.4, LMU Munich (Samastipur College), course: B.sc, language: English, comment: I have researched on nuclear force, my thought is well proved & stimulate others about such question. , abstract: Abstract :- it is well established that the forces between nucleons are transmitted by meson. The quantitative explanation of nuclear forces in terms of meson theory was extremely tentative & incomplete but this theory supplies a valuable point of view. It is fairly certain now that the nucleons within nuclear matter are in a state made rather different from their free condition by the proximity of other nucleons charge independence of nuclear forces demand the existence of neutral meson as amongst the same type of nucleolus (P-P) or (N-N). This force demand the same spin & orbital angular momentum. The exchange interaction is produced by only a neutral meson. The involving mesons without electric charge, that it gives exchange forces between proton & Neutron & also therefore maintains charge independence character. It is evident for the nature of the products that neutral mesons decay by strong & weak interaction both. It means that neutral mesons constituents responsible for the electromagnetic interaction. Dramatically neutral mesons plays important role for electromagnetic & nuclear force both. 12 pp. Englisch.
