Springer. Paperback. Book Condition: New. Paperback. 205 pages. Dimensions: 9.2in. x 6.1in. x 0.7in. The 11th international Conference on **ADVANCES IN PROSTAGLANDIN AND LEUKOTRIENE RESEARCH: BASIC SCIENCE AND NEW CLINICAL APPLICATIONS** was held, as in the past, in Florence, Italy, on June 4-8, 2000. A selection of lectures presented at the meeting is included in this volume, which continues the tradition of covering both basic and clinical aspects of prostaglandin and leukotriene research. At this meeting particular emphasis was given to the lipid mediator circuits of lipoxin and leukotrienes and to the expression of the COX2 gene. The plenary lectures by C. N. Serhan (Boston, Massachusetts, U. S. A.) and H. R. Herschman (Los Angeles, California, U. S. A.) were devoted to these areas, while S. Narumiya (Kyoto, Japan) and J. M. Drazen (Boston, Massachusetts, U. S. A.) presented the latest advances in the fields of prostanoid receptors and the genetics of asthma. Specific sessions focused on vascular physiopathology, cell differentiation and cancer, and the cardiovascular system. Lipoxygenases were discussed in detail at the molecular and cellular levels and attention was given to signal transduction pathways for leukotrienes and prostanoids. K. F. Austen (Boston, Massachusetts, U. S. A.) and T. Izumi (Tokyo, Japan) clarified the role and regulation of LTC synthase of leukotriene biosynthesis. Other important sessions described regulation and control of nitric oxide, cannabinimimetic eicosanoids, and the roles of eicosanoids in neuroscience. Applied clinical sessions devoted to the respiratory system and inflammation, including cyclooxygenase pathways, concluded the meeting. This item ships from multiple locations. Your book may arrive from Roseburg, OR, La Vergne, TN. Paperback.
